Abstract (en)

[origin: EP0375847A2] A pressure-sensitive recording sheet and a coating composition for such a recording sheet are described, the coating composition comprising microcapsules A, which contain a colourless dye dissolved in a solvent S1, and microcapsules B which contain a dye-free solvent S2 which does not dissolve the dye. <??>The pressure-sensitive recording sheet according to the invention has been improved with regard to the contamination caused by thermal effects without the image density being reduced.
