Abstract (en)

[origin: EP0376783A1] The invention concerns a carrying structure intended for producing pieces of furniture, of the type comprising at least one panel (2) provided with a plurality of perforations (3) for the holding of objects. According to the invention, the said perforations (3) are oblong and disposed in columns and the said panel (2) comprises folding lines (4) substantially parallel to the said columns of perforations and passing transversely through the said oblong perforations (3) of at least some of the said columns, the said panel (2) being folded alternately in one direction and in the other direction about each folding line (4) thereby forming a shutter-like structure (5). Application to the manufacture of display units, shelving, desks, etc... <IMAGE>
