Abstract (en)
[origin: EP0376791A1] A cooking top (1) comprises a device for support of control means (10), which is mounted pivotably on a casing (7) equipped with a ventilation circuit. The device comprises a body (12) having a duct (13), one end of which constitutes the outlet opening of the ventilation circuit. The body (12) can pivot between a position in which the control means (10) are accessible and the outlet opening is open and a position in which they are not. <IMAGE>
