Abstract (en)
[origin: WO8910456A1] A roofing system comprises a plurality of plate members (10), a series of side edge members (14) and a series of fascia edge members (22) all of synthetic material to be fitted over a prepared roof support structure (12). Each side edge member (14) has a plate portion (16), a barge portion (18) and a soffit portion (20). Each fascia edge member (22) has a plate portion (24), a fascia board portion (26) and a soffit portion (28). Adjacent members are interconnected together to form waterproof joints and provide a waterproof covering for the roof support structure (12). Each fascia edge member (22) incorporates a drainage channel (32) provided in the plate portion (24).
