Abstract (en)
[origin: US5145367A] PCT No. PCT/EP88/00692 Sec. 371 Date Feb. 12, 1990 Sec. 102(e) Date Feb. 12, 1990 PCT Filed Aug. 1, 1988 PCT Pub. No. WO89/01319 PCT Pub. Date Feb. 23, 1989. A vacuum instrument for dental hygiene and dental treatment which is intended to permit parodontological treatment of the tooth pockets. The instrument has an elastic suction cap which can produce a sealed vacuum over the gum pockets and interdental crevices. A treatment liquid is supplied to the suction cap and removed by the suction. Intermittent application of the vacuum produces a pumping action, which through likewise intermittent rinsing results in optimal cleaning of the interdental crevices as far as the base of the pocket.
