Abstract (en)
[origin: WO8901979A1] An X-chromosomal hypervariable region is described and DNA probes suitable for detecting DNA fragments comprising the hypervariable region are also described. Uses of the probes include analysis of X-chromosome activation status, clonality and diagnosis of X linked diseases.

Abstract (fr)
Sont décrites une région hypervariable chromosomique X, ainsi que des sondes d'ADN adaptées pour détecter des fragments d'ADN, comprenant la région hypervariable. L'utilisation des sondes comprend l'analyse du statut d'activation du chromosome X, la possibilité de clonage et le diagnostic de maladies liées à l'X.
