Abstract (en)
[origin: EP0378241A2] There is disclosed a storage container for an ink jet recording head, consisting of a part having a box-shaped recess (3) for housing the recording head, and another plate-shaped part (6) for converting the aperture of the recessed part (3). The recessed part (3) and/or the plate-shaped part (6) has volume resistivity not exceeding 10^{10} OMEGA .cm at least in a portion in contact with the ink jet recording head, and is transparent totally or in part, and both member have nitrogen permeability not $0.5 \text{ cc.mm/cm}^2 \cdot \text{sec.cmHg}$. 10^{-10} . The container serves to prevent solidification of ink and electrostatic destruction during storage of the recording head.
