Abstract (en)
[origin: WO8901442A1] The handle comprises a body or central part (3) in the form of a strap provided at each end with a hook (4) so as to engage from the outside in a slit (5) designed to receive it in the wall (6) of the package. According to the invention, the body is bent so that its ends are separated by a distance (L1) equal to that between the slits (5) in the wall (6) of the package for which it is intended. Application: fitting to cardboard packages.
