Abstract (en)
[origin: WO9000565A1] Interleukin II analogs and DNA sequences comprising structural genes coding for such analogs which differ from the naturally-occurring forms in terms of the identity and/or location of one or more amino acids are disclosed.

Abstract (fr)
L'invention concerne des analogues de l'interleukine II et des séquences d'ADN comprenant des gènes structuraux codant pour de tels analogues qui diffèrent des formes naturelles en terme d'identité et/ou de position d'un ou de plusieurs acides aminés.
