Abstract (en)
[origin: EP0378750A1] A crosshandled guard baton which comprises a longitudinal club (1) and a crosshandle (A) which is branched thereon at a place toward a club end with a branching length comparable to a breadth length of a man's hand palm and is comprised of two or three portional grip members which are laid on slidably one another to form a stand on a mounting base (4) on the club. This type of crosshandle is reinforced in this invention with equipment of a lightening device (B) and/or a gas ejecting device (C), which are accommodated in the club interior or in the handle. Thereby, a baton carrier is convenienceed in an encounter with a furious assailant in a gloomy area.
