Abstract (en)

Method and apparatus for making a thermally adhesive textile-based product by hot coating using spots. <??>The thermally adhesive polymer is deposited in the form of spots onto a transfer belt by the photoengraving roll, these spots of thermally adhesive polymer then being brought into contact with the textile support so as to ensure their transfer onto the latter. <??>The apparatus comprises a nonadherent belt (5) ensuring the transfer of the spots (4) of thermally adhesive polymer from the photoengraving roll (2) towards the textile support (3). <IMAGE>

Abstract (fr)

L'invention concerne un procédé et un appareillage de fabrication d'un produit thermocollant à base textile par enduction à chaud, par points. Le polymère thermocollant est déposé sous forme de points sur un tapis de transfert par le cylindre d'héliogravure, ces points de polymère thermocollant sont ensuite mis en contact avec le support textile de manière à assurer leur transfert sur celui-ci. L'appareillage comporte un tapis antiadhérent (5) assurant le transfert des points (4) de polymère thermocollant du cylindre (2) d'héliogravure vers le support textile (3).
