Abstract (en)

[origin: EP0379405A1] Method and apparatus for making a thermally adhesive textile-based product by hot coating using spots. <??>The thermally adhesive polymer is deposited in the form of spots onto a transfer belt by the photoengraving roll, these spots of thermally adhesive polymer then being brought into contact with the textile support so as to ensure their transfer onto the latter. <??>The apparatus comprises a nonadherent belt (5) ensuring the transfer of the spots (4) of thermally adhesive polymer from the photoengraving roll (2) towards the textile support (3). <IMAGE>
