Abstract (en)

[origin: EP0379475A1] In order simply to match a tipping device for emptying a refuse container to the requirements made in respect of the tipping operation and the overall size, the tipping shaft (4), which is mounted displaceably in a vertical guide (2) of a frame (1) and is provided with holders (3) for a refuse container, is provided with a swivel drive consisting of a cam plate (8) which is connected fixedly in terms of rotation to the tipping shaft (4) and interacts with at least one stopping member (9) fixed to the frame when the tipping shaft (4) is displaced. <IMAGE>
