Abstract (en)  
[origin: EP0379934A1] An easy-to-open package is provided, in which at least one part is made of a sandwich film with peel-off or break-out characteristics of certain layers of the sandwich film, the break-out or peel-off process being limited by an additional narrowly bounded notching (70; 86) to a region which is narrowly bounded in the longitudinal direction of the sealing line and is preferably assigned to the intersection region between a gripping tab (65; 78) from the lid material and the sealing line (63; 76). <IMAGE>
