Abstract (en)

[origin: CA2044582A1] The invention relates to a stand-up bag made of a heatsealable or weldable plastic sheet material and adapted to contain liquid and/or pasty products. For providing a stand-up bag of this type, which permits its contents to be dispensed in individual metered portions, is designed for simple handling and conveying and for simple production and space-saving storage in the unfilled state, the invention provides that the stand-up bag is provided with a dispensing opening defined by a closeable dispenser spout having one of its ends provided with a flange by means of which it is secured to a top portion of a sidewall of the bag.
