Abstract (en)  
[origin: EP0380337A2] A connector has a plurality of contact pins (10) each having a rectangular shape in section, a plurality of receptacle contacts (20) each having a substantially circular shape in section, and a housing having a plurality of slots (31) each for receiving said receptacle contact. Each of said receptacle contacts (20) has a contact spring (21) provided on an outer circumferential wall thereof and a recess (22) provided at an opposed portion to the contact spring on the outer circumferential wall. The contact pin (10) is clamped and held between the contact spring and the recess.
