Abstract (en)
[origin: WO8900952A1] A device for sterile filling of a sterile receptacle (7) comprises a head provided with sterilization members (12, 13, 15, 16, 35) and a device for raising the stopper (5) and then replacing it. A valve (17) controls the flow of the sterile product, which is delivered through a sterile channel (18).
