Abstract (en)

[origin: EP0381020A1] A vacuum-packaging machine for packaging waste is provided. The machine has a container space (2) for receiving an open bag, as well as a hinged lid (3) which hermetically seals the container space (2) to the outside, and a discharging device (21). So that the lid (3) is not soiled on its inner side, the bag is provided with a collar (29) and a groove (31) connected thereto. The latter is suspended in fixing bolts (13) in the lid. <IMAGE>
