Abstract (en)

[origin: EP0381765A1] A washing and drying machine having a water tank (18A, 18B) supported on a pair of rotary shafts (43) so that the water tank (18A, 18B) can be rotated in a machine body (14, 15) for carrying out the washing, rinsing and dehydrating steps with the water tank (18A, 18B) set substantially vertical, and a drying step with the water tank (18A, 18B) set substantially horizontal, the rotary shafts (43) being provided at the diagonally opposite corner portions of the machine body (14, 15), whereby it becomes possible to increase the dimensions of the water tank (18A, 18B) to as great an extent as possible in spite of the rotatable construction thereof, to enable the space in the machine body (14, 15) to be effectively utilized.
