Abstract (en)
[origin: EP0381814A1] The transport and/or storing container (1) for liquids and granular bulk materials has an outer casing (2) and a bottom (3) made of intersecting grid bars (4) and has an inner container (5) made of plastic. The inner container bears against the inside of the outer casing and rests on the bottom. In the region of the transition between the outer casing and the bottom, the grid bars are provided with roundings (6). The bottom is constructed as an independent component which has grid bars (4) which continue the vertical grid bars of the outer casing in the horizontal direction and are welded to said bars. <IMAGE>
