Abstract (en)  
[origin: EP0382148A2] A filter electrical connector comprises a dielectric housing (12), a metal shield case (13) covering the outside of the housing (12), aligned holes (21, 24) in rear walls (18, 19) of the housing (12) and the case (13), capacitors (14) secured in the holes (24) of wall (19) of case (13) and disposed in larger sections (22) of holes (21) in wall (18) of housing (12) without engaging the walls thereof, and electrical contacts (15) having contact sections (15a) extending through the capacitors (14) and extending through smaller sections (23) of the holes (21) without engaging the walls thereof and into housing (12). Post sections (15b) of the contacts (15) extend exteriorly from the rear wall (19) of case (13) and extend through apertures (26) of an inductor (16).
