Abstract (en)

[origin: EP0382153A1] In a swivel-mounted support element for a basin (8), in particular a wash basin, with a swivel arm (5) which is movable about a vertical axis (4) and at the free end of which the basin (8) is held, it being possible to supply and drain said basin via pipes (drainage pipe 18) guided at least partially through the swivel arm (5), it is proposed, to simplify adaptation, to provide a receptacle (15) for the basin (8) at the end of the swivel arm (5), this receptacle (15) being adjustable and lockable about a vertical adjusting axis (14). <IMAGE>
