Abstract (en)

[origin: EP0383112A1] A "L" shaped prefabricated insulating wall module for building structures comprising two perpendicular connected walls, that in association with a floor module allow realization of buildings. Each wall includes one external reinforced concrete panel (3) and an internal reinforced concrete panel (1), said panels being spaced apart and interconnected by transversal connecting steelrods and in the respective interspace an insulating foam material (2) is enclosed, net-work electric wiring and waterpiping being in it integrated. Said "L" module being associated with a rectangular flat module to be utilized as prosecution in walls and as floor component.
