Abstract (en)
[origin: JPH02269659A] PURPOSE: To simplify the handling of a container and sterilize the same as well as to easily dispose of the waste by integrating a handle of the container with a filling fitting and/or a discharge fitting. CONSTITUTION: A container 1 has a handle 3 (4) which is firstly useful for a simple transport and also for fitting in an appropriate hangar, e.g. a gas filling station as the case may be. The handle 3 (4) is disposed in the center of the container so that the handle 3 (4), e.g. a handle 4 is so structured as to integrally include a filling fitting 5 and a discharge fitting 6. That is, the handle 4, the filling fitting 5 and the discharge fitting 6 are formed when manufacturing the container 1. Accordingly, handling of the container is simplified, the container is sterilized, and waste disposal is facilitated.
