Abstract (en)
[origin: EP0383198A2] A fitted sink (1) is composed of separate sink modules, for example a basin (3) and a draining part (4), which are positively interconnected. For this purpose, both sink modules possess in each case one connecting flange which is covered by a connecting strip (13) and is positively held. Arranged underneath the connecting strip (13) is an outlet (21), into which leads in each case an overflow from the basin (3) and from the draining part (4). <IMAGE>
