Abstract (en)

This device is of the type comprising parallel driving rollers (1, 2), which are driven in rotation in opposite directions to each other, and one (1) of which is transversally moveable in relation to the other (2). <??>The device comprises a means (7, 8, 9, 10) for rotationally linking the rollers (1, 2), which is independent of their distance apart. <IMAGE>

Abstract (fr)

Ce dispositif est du type comportant des rouleaux (1, 2) d'entraînement parallèles, entraînés en rotation en sens inverse l'un de l'autre et dont l'un (1) est mobile transversalement par rapport à l'autre (2). Le dispositif comprend un moyen (7,8,9,10) de liaison en rotation des rouleaux (1,2), insensible à leur distance d'écartement.
