Abstract (en)

[origin: WO8903729A1] In a device for producing a water curtain for cooling the roll feed material, a particular arrangement of the water boxes and a particular association of the corresponding sheet openings are proposed in order to obtain a uniform water curtain or a water discharge which varies from zone to zone.

Abstract (fr)

Procédé de production de rideaux d'eau destinés au refroidissement de matières laminées. Afin d'obtenir un rideau d'eau uniforme, ou un débit d'eau à variations régulières, on dispose de manière appropriée les caissons d'eau et les ouvertures en fentes larges correspondantes.
