Abstract (en)
[origin: EP0384449A1] A case with essentially flat bounding surfaces is provided on the case edges with plug-on profiles (15, 20, 24, 30) which grip round the walls of the case and can be positively locked with one another. Edge strips (33, 34) grip around the end edge of the case wall and are in engagement with the angular plug-on profiles. The angular plug-on profiles can be bonded to one another or have a profile (17, 21, 26, 32) which forms a positive lock. <IMAGE>
