Abstract (en)
A masking member (110) produced by the molding of a sheet having a shape corresponding with a part (211) of a surface of an article (210) to be protected from a surface treatment, wherein said masking member has (a) pinching part(s) (114) into which (a) projection(s) of said part is(are) inserted, is provided in the present invention. Said masking member is attached to said part of said surface by inserting said projection(s) of said part into said pinching part(s) of said masking member to protect said part from a surface treatment such as coating, plating, and the like.
