Abstract (en)

A cover panel (10) for insertion into the top of a crate (C) so that the panel overlies the tops of the articles accommodated in the crate. The panel is sized so as to substantially close the crate and has foldable end panels (12, 14) at each of its opposite ends which include hinged anchoring flaps (20, 20a) for cooperation with adjacent handle openings in the crate to retain the panel in the crate.
