Abstract (en)
A sound screen for abating sound from a sound source, said screen comprising support members to which plate parts have been secured in a side-to-side configuration, which plates are of a light-transmissive material and comprise a stiffening that extends at least in a direction perpendicular to the longitudinal direction of the sound screen, which stiffening is made of a light-transmissive material so as to provide a maximally light-transmissive construction of the sound screen.
