Abstract (en)
[origin: WO8902221A1] An aerated or carbonated milk product drink comprising a milk product which has been carbonated with a gas or mixture of gases under pressure and packaged into a container. The milk product may be any natural or artificial milk product including dairy products and non-dairy milk products and includes combinations of milk products with other beverages such as fruit juices. The method of producing the carbonated milk product of the present invention comprises injecting under pressure carbon dioxide gas or a mixture of gases into the milk product at low temperature of less than 10 DEG C and high pressure of from 50 kpa to 200 kpa. The carbonated milk product remains carbonated in the package until opened for a reasonable shelf life.
