Abstract (en)
[origin: EP0318184A1] Methods and compositions are described that accelerate bone formation using granulocyte macrophage colony stimulating factors (GM-CSFs). The methods include treatments for osteoporosis and bone fractures. The compositions include GM-CSFs in combination with bone-formation stimulators and/or bone-resorption inhibitors.

Abstract (fr)
Sont décrits des procédés et des compositions accélérant la formation osseuse, utilisant les facteurs de croissance des colonies de granulocytes et de monocytes (GM-CSF). Les procédés comprennent des traitements pour l'ostéoporose et les fractures osseuses. Les compositions comprennent des GM-CSF en combinaison avec des stimulateurs de formation osseuse et/ou des inhibiteurs de résorption osseuse.
