Abstract (en)

[origin: EP0386339A1] An apparatus for transferring single bobbins or groups of bobbins, deposited with essentially horizontally oriented bobbin axes on a bobbin store, to a bobbin transport system, with a movably mounted lifting-cylinder device having on its movable lifting element a carrier for bobbin adaptors which, during the outward stroke of the movable lifting element, can be introduced centrally into the bobbin core or cores of the single bobbin or bobbin groups deposited on the bobbin store, is characterised in that the lifting-cylinder unit (1) is mounted on a rotary head (2) rotatable about a horizontal axis and the bobbin transport system (C) has a suspended conveyor device (4) with hanging-down suspended bobbin holders (5) for the bobbin adaptors (6). <IMAGE>
