Abstract (en)

[origin: EP0386496A1] The invention relates to a radiator cover with two lateral cover parts (12) and an upper cover part (10) and with fastening means (18, 20) for the lateral cover parts (12) on the radiator. The upper cover part is in this connection provided at its lateral end sections in each case with at least one locking means which projects from the upper cover part and is designed to engage with a corresponding recess which is provided in each of the upper end sections of the lateral cover parts.
