Abstract (en)
[origin: EP0386661A1] An extension crown for a skylight or the like is disclosed, having a connecting flange (2) to which is applied, embedded in an adhesive compound (4), a frame (5) for fastening, for connecting a roof foil, for improving the statics and for preventing the penetration of rain through a gap formed when bending moments occur. This frame (5) is constructed as a flat profile with a projection (6) on the side of the extension crown, this projection (6) being constructed preferably so that it is tapering and provided with an enlargement (6a) as end seal. <IMAGE>
