Abstract (en)

The invention concerns a heat-fusible textile (1) for stiffening and its method of manufacture. It comprises: - a layer of non-woven textile (2), - a weft (3) - a knitted thread (4) providing the connection between the weft (3) and the layer of non-woven textile (2) - a heat-fusible adhesive layer (5). According to the invention, the weft (3) is formed of threads (6) having undergone a high degree of shrinkage after its association with the textile layer. <IMAGE>

Abstract (fr)

L'invention concerne un textile thermocollant (1) destiné à l'entoilage et son procédé de fabrication. Il comporte : . une couche de textile non tissée (2), . une trame (3), . un fil tricoté (4) assurant la liaison entre la trame (3) et la couche de textile non tissée (2), . une couche d'adhésif (5) thermocollant. Selon l'invention, la trame (3) est composée de fils (6) ayant subi une forte rétraction postérieurement à son association à la couche textile.
