Abstract (en)
[origin: EP0387239A2] The hairbrush has a brush body (1) which is fitted with bristles over the entire shell region. In order to achieve a brush which is convenient to handle and can be used in a variety of ways, the brush body (1) has a cross-section (2) which corresponds essentially to a segment, the bristles (3a), distributed over the curved part (2a), determining an approximately cylindrical covering surface (4a) and the bristles (3b), distributed over the chord part (2b), determining a covering surface (4b) which is angled approximately in the shape of a wedge.
