Abstract (en)

[origin: WO9002779A1] Silicate fillers from the group of phyllosilicates coated with trialkoxysilanes having amino, epoxy, imidazoline, succinic acid anhydride, cyclohexyl, urea and/or vinyl groups are used in anticorrosive lacquers, spray fillers and stove stone-guard fillers, giving better results than uncoated fillers.

Abstract (fr)

On utilise des charges au silicate appartenant au groupe des phyllosilicates dans des laques anticorrosives, des charges de pistelage et des charges thermodurcissables pour antivibrage. Ces charges au silicate sont enrobées de trialkoxysilanes qui contiennent des groupes amine, époxyde, imidazoline, anhydride succinique, cyclohexyle, urée et/ou vinyle, et permettent d'obtenir de meilleurs résultats que des charges non enrobées.
