Abstract (en)  
[origin: EP0387494A2] In a base sliding drawer having a web (20), projecting at the front upper edge, for attachment of a front piece (22), and having a holder (26), which is set back in relation to the web, for a base panel (24), the holder is formed by two adaptors (26) which can be attached to the base panel (24), are constructed as plastic injection mouldings, and are held in a clamping manner on the frame (16) of the sliding drawer. This manner of construction allows simple assembly of the base panel (24) and adaptation of the set-back portion (D) of the base to the respective furniture system. <IMAGE>
