Abstract (en)  
[origin: EP0387657A1] The display unit is constructed as an independent complete assembly and is mounted, by means of its frame (11), in a replaceable manner as an entity on a front side of a device, the frame (11) being designed as a support for all the individual parts (sight glass 14; seal 15, 16; printed-circuit board 33; metal cover 44) of the assembly. This results in a display unit which is constructed such that it is easy to assembly and maintain. <IMAGE>
