Abstract (en)
[origin: EP0387726A2] For the purpose of taking over, storing and delivering folded products (1), a steel band (18) provided with mutually spaced holding plates (19) is led around rollers (e.g. 20). In this arrangement, the holding plates (19) open, so that the folded products (1) can be taken by a sheet half (11) at the side opposite the rear of the fold. <IMAGE>
