Abstract (en)

[origin: EP0387994A2] A transformer whose windings are insulated with cellulose-based materials and are immersed in a carboxylic ester liquid, the liquid and the load capacity rating of the transformer being such that the normal winding hot-spot temperature is in the range 110 DEG C to 130 DEG C, preferably in the region of 130 DEG C, and thus substantially hotter than 98 DEG C.
