Abstract (en)
A masking member (110) produced by the molding of a sheet (111) having a shape corresponding with a part (121) of a surface of an article (120) to be protected from a surface treatment, wherein said masking member has (an) indentation(s) (111A) (111B) into which (a) projection(s) (121A) (121B) of said part is(are) inserted, is provided in the present invention. Said masking member is attached to said part of said surface by inserting said projection(s) of said part into said indentation(s) of said masking member to protect said part from a surface treatment such as coating, plating, and the like.
