Abstract (en)
[origin: EP0388516A2] A lock with lock plug (3) capable of idling is disclosed, which comprises a housing (1), a lock sleeve (2) rotatably fitted therein and a lock plug (3) rotatably fitted therein and having an axial key insertion hole (4). As in an ordinary lock, the lock can be unlocked by merely turning a key after insertion thereof in it so long as the key is the regular one and is not any other picking tool.
