Abstract (en)
An apparatus for transporting a sheet includes a first transporting path provided with rollers (36, 39) for transporting the sheet to an image forming section, a second transporting path for conducting the sheet in a direction (A) transverse to the first transporting path, said second transporting path having a step in the direction of height with respect to said first transporting path, and a control section for controlling the first and second transporting paths so that they are coupled to each other when the sheet is inserted over the second transporting path.
