Abstract (en)
[origin: US5024000A] The tool comprises a body (1) containing a motor driving a rotor, in particular provided with blades working through an orifice (14) formed between two guide pieces (10, 11). It is provided with two lateral handles (15, 16) situated in the extension of the rotor. The guides (10, 11) are removable and may, in particular, be convex in order to form an electric spokeshave. The orifice for discharging the shavings (19) is situated at the front and on the top of the rotor.
