Abstract (en)
[origin: EP0390090A2] An image fixing apparatus includes a heater (20) having a heat generating resistor (21b) for generating heat upon power supply thereto and a base member for supporting the heat generating resistor; a film (25) slidable on the heater, wherein a recording material (P) supporting a visualized image is heated by the heat by the heater (20) through the film (25); and a projection toward the recording material for guiding the film (25), so that the film is moved (25) without contact to an edge of the base member.
