Abstract (en)
[origin: EP0390330A2] Apparatus (100) for testing the quality of a seal on a package overwrap comprises a heater tip (114) for burning a hole in the overwrap without breaching the integrity of the package, means for applying suction to the overwrap; means for introducing air through the hole between the overwrap and the package; and means for determining whether the rate of air leakage from the overwrap is within acceptable limits by measuring the back pressure in chamber through which air is introduced.
