Abstract (en)

[origin: EP0390628A1] The device comprises an outlet branch (3), an electric motor (2) causing the pump to rotate and an electrical control circuit (5, 6) for the motor (1), together with a temperature sensor for the outlet branch (3) sending a temperature signal to a transducer (9) which opens the electrical control circuit of the motor (1) when the temperature sensed exceeds a given threshold. Water supply installation. <IMAGE>
